

# Reporting & Analytics

Netchex gives you powerful reporting and analytics at your fingertips. Report builder, flexible formats, and point & click features let you put a personalized spin on analytics. Gain the insights you need to make complex business decisions to better your company.

## On-Demand Reporting

With NetInsight, Netchex’s connected, up-to-the-minute data helps you make better real-time business decisions about labor costs, benefits activity, turnover, compliance, and more.

## Organized Data Pulls

Netchex helps you find exactly what you need with comprehensive data pulls and granular views at every level of an organization. Create formatted reports segmented by topic (payroll, benefits, performance, etc.) with automated and calculated analytics features.

## Highly Customizable

Creating custom labels, categories, and views has never been more simple. Customize and save data pulls with expansive filters and sorting options to automatically generate information in the format you need for scheduled reporting.

## Simple Output

Easily display and distribute analytics with customized filters, pre-set options, report builders, graph designs, and pictorial views. Export options include PDFs and Excel spreadsheets, as well as email ready & print publishing formats.
